- Proposed Turbine Location
- Proposed Turbine Location 10 - 40 km Buffer (10 km Increments)
- Edinbane Turbine
- Ben Aketil Turbine

Zones of Theoretical Visibility (Bare Earth)

Balmeanach Ben Aketil Edinbane

Note
 This Zone of Theoretical Visibility (ZTV) has been generated using ESRI ArcGIS Spatial Analyst extension. The digital terrain model (DTM) has been derived from OS terrain 50 dataset model with an accuracy of +/-10m. Earth curvature has been included in the ZTV calculation and refraction of light has been applied using ESRI default settings. The ZTV has been generated from a viewing height of 2m above ground level which falls within recommendations by "Visual Representation of Windfarms" prepared for Scottish Natural Heritage (SNH) February 2017 - Version 2.2.

The use of ZTV mapping at this stage is limited and the following assumptions should be noted:

- The ZTV has been generated using the indicative turbine locations for Balmeanach Wind Farm
- The baseline ZTV has been generated from Operational and Consented turbine locations listed below.
- The proposed and operational turbine blade tip heights that have been used are listed below:
 - Balmeanach = 149.9m
 - Ben Aketil = 100m
 - Edinbane = 100m
- The ZTV is generated from a bare earth terrain and does not account for the screening effect of features within the landscape such as settlements and woodland. It does not indicate potential visual effects or show the likely significance of effects. It shows potential theoretical visibility only. The ZTV has been produced for the purpose of informing 'on the ground' visual assessment.
- The ZTV colour palette has been specifically developed to assist viewers with reduced sensitivity to red, green and blue light.
